Comments

This well permit is being refiled due to expiration. This well pad has not been constructed, however, the access road going through the pad and the existing pipeline infrastructure was constructed in April 2012 to access the MDP 26 pad. No wells have been drilled on the location. There will be no changes to the previously approved APD including the proposed SHL, BHL, drilling plan, casing and cement program, or mineral lease information. The uploaded well location plat and directional remain the same. The distance to nearest well completed in the same formation / permitted or existing well penetrating objective formation was measured to the producing Federal 22A-33-691.

Please note the drilling fluids and cuttings disposal have been corrected to reflect the Waste Management Plan. A closed-loop drilling system will be used to separate solids from liquids. Dry cuttings from the wellbore will be directed to a cuttings containment to be stored for a period prior to site reclamation for beneficial reuse.
