**WELL ABANDONMENT REPORT**

This form is to be submitted as an Intent to Abandon whenever an abandonment is planned on a borehole. After the abandonment is complete, this form shall again be submitted as a Subsequent Report of the actual work completed. The approved intent shall be valid for six months after the approval date, after that period, a new intent will be required. Attachments required with the Intent to Abandon are wellbore diagrams of the current configuration and the proposed configuration with plugs set.  
A Subsequent Report of Abandonment shall indicate the actual work completed. Attachments required with a Subsequent Report are a wellbore diagram showing plugs that were set and casing remaining in the hole, the job summaries from all plugging contractors used, including wireline and cementing (third party verification) and any logs that may have been run during abandonment.

Technical Detail/Comments:

This form 6 for PA is being re-submitted to give more detail and to clarify date of PA. A form 6, docnum 1906093 was submitted 12/14/2009, but with incomplete information and given an incorrect PA date. P&A before 9/7/2005 therefore no NAD83 lat/longs and the existing lat/longs appear to be the most accurate when compared aerial photographs of residual disturbance. The attached WBD and supporting work summary has already been uploaded in email exchanges resolving this issue, therefore do not reload into the system; they are docnums 2101200 and 2101201. Cement was tagged to confirm depths. Marker placed subsurface with 10 sx cmt on top. Three perf csg @ 1350', 1300', 1004' & sqz 53 sx for all three perfs. Then perf'd 100' with 44 sx No CICRs. There was never a flow line/ pipeline to the well - it never produced

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
