As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

During routine maintenance a flowline leak was identified and upon excavation and repair hydrocarbon impacted soils were discovered. Impacts are limited to soils. No groundwater was encountered in the excavation. Further investigation will be completed to delineate the extent of impacted material, including excavation and soil sampling.

How was extent determined?			
<p>On February 23, 2016, a flowline leak was discovered during a routine site visit at the Brereton MD 61S69W14NWSE location. Approximately 500 cubic yards of impacted soil were excavated and transported to the Buffalo Ridge Landfill in Keenesburg, Colorado. Groundwater was not encountered in the excavation. Soil samples were collected from the sidewalls and base of the excavation area and submitted to Summit Scientific Laboratory in Golden, Colorado for analysis of benzene, toluene, ethylbenzene, and total xylenes (BTEX) and total petroleum hydrocarbons (TPH) - gasoline range organics (GRO) by USEPA Method 8260, TPH - diesel range organics (DRO) by USEPA Method 8015. Laboratory results indicate that constituent concentrations in the soil samples in the final extent of the excavation were below the applicable COGGC Table 910-1 standards. Soil analytical results are summarized in Table 1. Final excavation extent and soil sample locations are illustrated on Figure 1. Laboratory analytical reports are included as Attachment A. Based on the soil analytical data, 8 North is requesting a no further action determination (NFA) for this release.</p>

CORRECTIVE ACTIONS

#1 Supplemental Report Date: 03/16/2016

Cause of Spill (Check all that apply) ☐ Human Error ☒ Equipment Failure ☐ Historical-Unknown
☐ Other (specify) _____

Describe Incident & Root Cause (include specific equipment and point of failure)

The flowline from the Brereton 14-1 wellhead failed at the riser to the separator due to external corrosion.

Describe measures taken to prevent the problem(s) from reoccurring:

The Brereton 14-1 flowline was repaired and pressure tested. Additionally, the Brereton 14-8J flowline and dumpline from the separator was pressure tested. All lines passed the pressure tests and were witnessed by a representative of Boulder County. All pressure test data was submitted to the COGCC under separate correspondence.

Volume of Soil Excavated (cubic yards): 500

Disposition of Excavated Soil (attach documentation) ☒ Offsite Disposal ☐ Onsite Treatment
☐ Other (specify) _____

Volume of Impacted Ground Water Removed (bbls): 0

Volume of Impacted Surface Water Removed (bbls): 0

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

Basis for Closure: ☒ Corrective Actions Completed (documentation attached)

☐ Work proceeding under an approved Form 27
