Waters of the State  Residence/Occupied Structure  Livestock  Public Byway  Surface Water Supply Area   
As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Pumper arrived on location at 9:30am on 3/27 to discover a small line leak in the flowline going into the battery separator. There was approximately 0.5 bbl of fluid on the ground at the release point. Well production rates average around 1.5 bbls of oil/water per day, so that is the maximum release that could have occurred based on when the well was checked. Fluid is contained on the battery wellpad.
