

Note: Cuttings from the wells drilled on the MV 16-9 pad will be hauled to and managed on the west side of the existing GM 41-4 pad. Area may be dug out 6' to 12' to obtain material to mix with cuttings. Fill material from the north east side of the pad will be used to cap the cuttings after they have tested clean.

Legend

- Production Gas Well (Niobrara)
- Proposed Cuttings Area
- Existing Road
- Re-establish Drainage
- Existing Cuttings Area
- Reclaim Drainage Diversion
