Hi, Shayelyn,

Continuing in my theme of trying to clear out these applications, the following three 2A's are on hold by Doug awaiting distance to nearest water well:

Please advise at soon as possible.

Thank you!

Hi Barbara,

Thank you for the email. Per my conversation with Doug yesterday, our team has identified that the water well's lat/long is incorrect on the Department of Water Resources database. We are currently working with them to fix this problem. I should be able to send the new distances to the water well to Doug by the end of the week.

Thank you!

Barbara and Doug,

Please see the information below regarding the new water well in the vicinity of the three 12-65-25-25 pads. I have included new Hydro maps for the 4CH and 6NH pads. The water well is not visible due to the scale of the map on the 4NH pad, so I did not include it.

Doug can you please update the 2A's with this information? Please note, the Department of Water Resources database may not be updated with the new lat/long yet. Our land team will be submitting new paperwork to their office this week.
