

Photo 1. View of the western portion of the project area from the northwestern corner facing southward. Vegetation is grazed and emerging vegetation is largely comprised of annual species such as alyssum (*Alyssum simplex*) and cheatgrass (*Bromus tectorum*) mixed with seeded species such as smooth brome (*Bromus inermis*) . At this time in the season it appears consistent with surrounding pasture.

Photo 2. View of the project area from the northwestern corner facing center.

Photo 3. View of the northern portion of the project area from the northwestern corner facing eastward.

Photo 4. View of the southern portion of the project area from the southeastern corner facing westward.

Photo 5. View of the eastern portion of the project area from the southeastern corner facing northward. Deep arroyo that flows adjacent to the eastern portion is shown in upper right-hand portion of photo.
