BMP Type	Comment
PROPOSED BMPs	<p>Jetta Operating Co., Inc.</p> <p>Veda Taylor #1</p> <p>SW NW Section 10- T35S -R43W</p> <p>Baca Co., Colorado</p> <p>Best Management Practices Summary</p> <p>Stormwater Management Plans (SWMP) will be in place to address construction, drilling and operations associated with Oil & Gas development throughout the state of Colorado in accordance with Colorado Department of Public Health and Environment (CDPHE).</p> <p>BMP's will be constructed around the perimeter of the site prior to, or at the beginning of construction. The BMP's used will vary according to the location, and will remain in place until the pad reaches final reclamation.</p> <p>Spill Prevention Control and Counter measures (SPCC) plans will be in place to address any possible spills associated with Oil & Gas operations throughout the state of Colorado in accordance with CFR12.</p> <p>Housekeeping will consist of neat and orderly storage of materials and fluids. Wastes will be temporarily stored in sealed containers and regularly collected and disposed of at offsite, suitable facilities. If spills occur prompt cleanup will be required to minimize any commingling of waste materials with stormwater runoff. Routine maintenance will be limited to fueling and lubrication of equipment. Drip pans will be used during routine fueling and maintenance to contain spills or leaks. Any waste product from maintenance will be containerized and transported offsite for disposal or recycling. There will be no major equipment overhauls conducted onsite. Equipment will be</p> <p>transported offsite for major overhauls. Cleanup will consist of patrolling the roadways, access areas, and other work areas to pick up trash, scrap debris, other discarded materials, and any contaminated soil. These materials will be disposed of properly.</p> <p>The above BMP's will be provided to all Jetta Operating Co., Inc. employees, contractors and will be posted in the company trailer located on location during drilling, completion and production operations.</p>

COGCC Comments

Comment	User	Date
A follow-up inspection will be performed during the growing season to reassess vegetation establishment. Reseeding efforts should take place as soon as possible to allow vegetation establishment within the current growing season. Weeds may need to be controlled to facilitate the establishment of desirable vegetation.	CostaR	04/12/2016
Consult with the surface owner to determine the dry land crop activity and reseeded of the location. The location and former access road will need to re-establish a uniform vegetation cover with total perennial non-invasive plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture that matches the adjacent pastureland or a seed mixture requested by the landowner. Continue to monitor and manage this site until Final Reclamation has Passed.	CostaR	04/12/2016
