**Subject:** Re: Sidetrack Westwind 7

Please proceed as proposed.

Thanks,  
Diana

Diana,

We are having trouble on the Westwind #7, we landed a little high and haven't been able to recover back into zone as well as we expected given our seismic data. The same throw we saw on Westwind 1 is present and we will be able to drill across the graben more effectively this time as well.

With your permission we would like to pull back to 7550' which will allow us to stay in zone and then drill through this throw at TVD of the Codell.

API Number - 051234101000

Total MD drilled to: 9995' at the moment

Surface casing – 9 5/8" 36# set at 1560'.

No fish in hole

The plan would be to open hole sidetrack

Proposed sidetrack point – 7550'

Objective formation of sidetrack: Codell

Proposed BHL: 1546 FSL 310 FWL Sec 8, T6N, R67W (Same as original APD).

Thanks for your time,

**Ty Entenmann**
