H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: 0 in ppm (parts per million) Date of Measurement or Sample Collection 04/13/2016

Description of Sample Point:

Ted-Hazel 11-1 Station # 067-7171 Method Name NGAEMS1

Absolute Open Flow Potential 1.3961 in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

The flow runs the pump jack and balance is open to atmosphere at this time. Considering put a tank heater in.

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: 1320 FEET

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: 1320 FEET

Description

Operator Comments:

This well was drilled in the late 80's by my father. It has remained in the family. Hubbs III, LLC respectfully request approval to vent associated gas from the referenced well as an integral part of the ongoing oil production. This Sundry Notice provides additional details regarding Hubbs III, LLC. analysis of the economics of selling the gas produced by the well field. Details concerning the volume and quality of produced gas from this well is included. The analysis hereby submitted clearly shows the negative economics of attempting to market the gas from the well. The closest valid gas pipeline is about 5-6 miles DJ Simmons line. IF the REd Mesa Holding gas line was up and running it would be around 1-2 miles. The analysis clearly demonstrates that the project is significantly negative Net Present Value and a negative Internal Rate of Return. The well is incapable of oil production without venting and will typically produce up to 3 days before oil production ceases. WELL is presently turned off awaiting approval from COGCC's approval. It would be appreciated if this can be expedited. I have always tried to comply with COGCC

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
