Rip Rap	Fail					
Waddles	Fail					
Berms	Fail	Compaction	Pass			

S/A/V: **ACTION REQUIRED** Corrective Date: **06/14/2016**

Comment: Lack of BMP's on the North perimeter of location is allowing irrigation water to flow onto and across location. South perimeter berm was constructed with a low spot that is collecting and not diverting water. The collected water is leeching through berm and flowing down grade and into landowners horse pens. Rip rap and sediment trap in SW corner of location are full of sediment and require maintenance. Waddles below sediment trap are broken and deteriorated and need to be replaced.

CA: Install or repair required BMP's per Rule 1002.f. Refer to the 1002.f guidance document for further details. "Request that corrective actions be completed as soon as possible due to current conditions at site and because this is in response to a formal complaint, but no later than corrective action date 06/14/2016".

Pits: NO SURFACE INDICATION OF PIT
