

Photo 1. View of the western portion of the project area from the well pad entrance facing southward. Vegetation in this portion is largely comprised of smooth brome (*Bromus inermis*), western wheatgrass (*Pascopyrum smithii*), doc (*Rumex* sp.).

Photo 2. View of project area from the well pad entrance facing center.

Photo 3. View of robust musk thistle (*Carduus nutans*) in the southwestern portion of the project area.

Photo 4. View of the southern portion of the project area from the southwestner corner facing eastward. Most of the vegetation in this portion is ruderal weeds such as musk thistle, flixweed (*Descurainia sophia*), and tumbled mustard (*Sisymbrium altissimum*).

Photo 5. View of the northeastern portion of the project area from the southeastern portion facing northward.

Photo 6. View of debris in the northern portion of the interim reclamation area that needs to be removed.

Photo 7. View of tire tracks in the interim reclamation area that need to be seeded.

Photo 8. Birdseye view of Russian knapweed (*Acroptilon repens*) in the northern portion of the project area.
