

DRILLING COMPLETION REPORT

This form is to be submitted within 30 days of the setting of production casing, the plugging of a dry hole, the deepening or sidetracking of a well, or any time the wellbore configuration is changed. If the well is deepened or sidetracked a new Form 5 is required. If an attempt has been made to complete/produce a well, then the operator shall submit Form 5A (Completed Interval Report.) If the well has been plugged, a form 6 (Well Abandonment Report) is required.

FORMATION LOG INTERVALS AND TEST ZONES

FORMATION NAME	Measured Depth		Check if applies		COMMENTS (All DST and Core Analysis must be submitted to COGCC)
	Top	Bottom	DST	Cored	
PARKMAN	3,845		NO	NO	
SUSSEX	4,590	4,780	NO	NO	
SHARON SPRINGS	6,804		NO	NO	
NIOBRARA	6,882		NO	NO	

Comment:

The distance for the Section from north to south in the W/2 is averaged from the west side and center measurements when figuring the TPZ footages as permitted. The Interpolated TPZ is planned at a depth of 7269' (which gives the Permitted distance FSL & this will be the Top Perforations) - any changes to this will be reported on the Form 5A.

O.H. Logging Exception for API#05-123-37282, Form 4 Doc # 400962988, approved 1/7/2016.

Of this pad of 12 permitted wells, 6 were drilled, each from the slot to the west of the permitted slot, thus requiring an additional slot A to be added to the west end and the original slot L to be abandoned. The G-10HN was drilled from the surface slot of the F-10HN - thus on the Well Information Tab, surface footages are from the F slot, and the TPZ and BHL footages were calculated from the F slot.

An As Built Survey Plat is attached as well.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
