Rick

I see no issue with the lat/long point you have chosen. Go ahead with making the change on the Form 19. Thank you.

Craig or Scott,

I have one requested change to the Initial Spill Report submitted for the release related to the lightning strike at the Injection Facility in Section 16-9N-59W, Weld County.

On the submitted Form 19, BNN supplied the Lat/Long of the wellhead/UIC Facility associated with the release. However, for spills COGCC would like to have the Lat/Long of the physical release location. I know that an exact spill point is difficult for an incident such as this. Therefore I propose using a point generally near the south end of the tank battery as shown by the red "X" in the 2015 aerial image below. The Lat/Long of the red "X" is 40.7493436 / -103.991678. If you agree with this change, I can make the change on the form since BNN can no longer access it.

Thank you,

Rick
