S/A/V: **ACTION REQUIRED** Corrective Date: **04/30/2015**

Comment: Culvert at well pad entrance is full of sediment. Erosion from a bar ditch/diversion along the access road has eroded a hole and channel into a cut slope near the well pad. Stormwater BMPs are deteriorated and need replacing/repair in places and maintenance in others. Sediment trap at eastern edge is breeched. These are similar and same issues identified in previous inspections document number 667100414 and 680600189. Corrective action date retained from previous inspection to document days of non-compliance, corrective action is still required.

CA: Install or repair required BMP's per Rule 1002.f. Refer to the 1002.f guidance document for further details.

Pits: ☒ NO SURFACE INDICATION OF PIT
