Comment:

This well was originally drilled and produced from the Codell in 2005. In 2007, it was recompleted in the J Sand and commingled with the Codell. In 2009 a CIBP was put over the Codell and the J Sand and the well was recompleted in the Niobrara. In August, 2011, the CIBP @ 7436 was milled out and pushed to 8055 and the well has been producing from the Niobrara, Codell and J Sand. No 5A was submitted for this operation in 2011.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
