

Facility # 116705

Carl Allen 18

Carl Allen 18 was plugged and abandoned on November 26th, 1990 (please see the attached sundry).

Wexpro Company submitted a sundry stating that re-contouring of the well location had occurred in September 1995 (see the attached sundry). This concludes that pit had to have been backfilled previous to the re-contouring of the well location. BLM (surface owner) approved the sundry, which would not have occurred had there been a pit present on location.

All of the above mentioned work was completed before December 30, 1997.

Wexpro requests closure and NFA for facility #116705.

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Carl Allen Well No. 18 was plugged and abandoned on November 26, 1990 as follows:

- Pumped 25 sacks of Class "G" with 3% Ca Cl₂ in 10-3/4" x 7" annulus (calculated plug length 94').
- Set 10 sacks Class "G" cement with 1% Ca Cl₂ (52') on top of existing C.I.B.P. at 2050'.
- Set 60' plug (Class "G" with 3% CaCl₂) at surface in 7" casing.
- Cut off casing head. Cement level in 10-3/4" x 7" annulus was at surface.
- Installed regulation dry hole marker.
- Location restoration and seeding will commence in Spring 1991 per previous conditions of approval (Sundry dated 11/01/90).
