Rachel,

I approved the resubmitted Form 19. I understand that you might have been waiting for more information, but unfortunately Rule 906.b. requires the Supplemental Report (with Spill Detail Report) be submitted within 10 days of the release discovery date. The only exception is if the Spill Detail Report is completed at the same time as the Initial Spill Report.

Please be sure to maintain compliance with the Spill/Release Reporting deadlines in Rule 906.b. in the future.

Thanks,
Rick

Thanks for the follow up Rick. I'll resubmit the report with the required diagram today. We were hoping to have the cleanup documentation to be able to ask for project closure, which led to the slight delay in the filing of the Supplemental.

Thanks,
Rachel

Rachel or Josh,

The Supplemental Spill Report submitted for the Waag Pad did not contain the aerial photograph or topographic map showing the spill/release location as required by Rule 906.b.

I have returned the Form 19 to draft so that you can attached the required map.

In addition, note that this Supplemental Spill Report was received on June 1, which is later than the 10 calendar day reporting deadline required by Rule 906.b. Please be sure to submit future spill reports in a timely manner.

Let me know if you have any questions about this.

Regards,

Rick Allison, P.G.
