Berms	Fail			SI	Fail	
Ditches	Fail					

S/A/V: **ACTION REQUIRED**      Corrective Date: **07/08/2016**

Comment: Storm water is flowing down access road and leaving alluvial fan of sediment in NW corner coming onto location. Storm water is flowing N downhill onto and across location. Water and sediment are migrating off the NE corner of location. At S perimeter of location there appears to have been a ditch and berm combination at one time. If so they are no longer functioning and water flow is creating small erosion channels and depositing sediment onto location. Problem will continue to grow if water is not managed or properly diverted from flowing across location.

CA: Install or repair required BMPs per Rule 1002.f. Refer to the 1002.f guidance document for further details.

Pits:  NO SURFACE INDICATION OF PIT
