Paul, I have changed the status of the remediation to closed with no further actions required at this time.

Based on review of the information submitted it appears that no further action is necessary at this time. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, further investigation and/or remediation activities may be required at the site.

Peter

Hello Peter,

I've attached an NFA request for the following site. Let me know if you have any questions. Have a good weekend.

Karich Helen E Unit #2 et. al.

Remediation #4480
