The surface locations of Bayswater's proposed wells have been staked outside of the Colorado Oil & Gas Conservation Commission (COGCC) Rule 318A.a. Greater Wattenberg Area Drilling Window and are being permitted as exception locations. Bayswater's northern most proposed well is located approximately 251 feet east of the SESE Drilling Window. These wells are being proposed outside of the Drilling Window due to an agreed upon location in the Surface Damage Agreement with the surface owner. Bayswater has obtained written permission from the surface owner by way of signed waiver.

Bayswater respectfully requests the COGCC to review the enclosed information and approve the requested exception location request and Applications for Permit to Drill for these wells.

Respectfully,
