Type	Management	Condition	Comment	GPS (Lat)	(Long)
Drill Cuttings	Land Application	Adequate	followup inspection of areas on nearby property. Sediment had migrated from land application site onto neighboring property to west of 123-18274. Remedial actions have been completed with respect to this issue and confirmed by operator and landowner. Site inspection indicates that mud had been removed and backyard driveway and stable area made level again. Small berm at edge of wheat field (land application site) and along fence line of neighboring property. See comments about period of use and closure requirements at start of inspection notice.		

Complaint:

Tracking Num	Category	Assigned To	Description	Incident Date
200439757	PROPERTY DAMAGE	Gintautas, Peter	Location is described as: Mud farm north and east of the property. Complainant states: The basement has began flooding in the past couple of years and we are discharging water at a rate of roughly 40-60 gallons per hour. We also are getting mud all over our property when it rains from the mud farm that is next door to us. I currently have trenches 3-4 feet deep on my property from the water that drains onto our property from the mud farm. They don't have a proper drainage system in place so when it rains all the water and mud comes to our property which is slightly downhill from them.	06/17/2016
