<input type="checkbox"/> Other _____	<input type="checkbox"/> Status Update/Change of Remediation Plans for Spills and Releases	

COMMENTS:

30-Day Blow Down Test Procedure
 During bradenhead test procedures the above well has been determined to present conditions needing further review and possible action. Please allow Anadarko Petroleum Corp. to vent bradenhead valve on the subject well to an enclosed tank for 30 days in order to test and determine if further remediation to the wellbore will be necessary.

The bradenhead will be vented for 30 days, then shut-in for 7 days and a new Bradenhead test performed. This procedure may be repeated up to three cycles. At the conclusion of the cycles, if the pressure has not satisfactorily decreased a remediation plan will be proposed.

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: _____ in ppm (parts per million) Date of Measurement or Sample Collection _____

Description of Sample Point:

Absolute Open Flow Potential _____ in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: _____

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: _____
