Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

Approximately 20 cubic yards of contaminated soils were encountered while reclaiming the site. The source of the contamination is believed to be from an old (historic) spill at the location. The contaminated soils have been excavated and are being land-farmed (treated) on-site until COGCC clean-up standards have been met. All land owner and agency notifications have been completed.
