1	Drilling/Completion Operations	One of the first wells drilled on this pad will be logged with an open-hole resistivity log and gamma ray log from kick off point to surface (vertical section of well). All wells on the pad will have a cement bond log with gamma ray run on production casing into the surface casing. The form 5 completion report for each well drilled on this pad will have all logs run on that well noted and attached. If no logs were run, that also will be clearly noted on that well's form 5.
