Inspector Comment:

Engineering Integrity inspection conducted on 7/7/2016 with a primary focus on the flowlines associated with this well. Details of observations made during this field inspection are available in the equipment/ flowline and stormwater sections of this report. Please also note the comments located at the end of this report. Photo's uploaded can be accessed via link(s) at end of report.

Pits: NO SURFACE INDICATION OF PIT

COGCC Comments

Comment	User	Date
1101e. Pressure testing of flowlines. (1) Before operating a segment of flowline it shall be tested to maximum anticipated operating pressure. In conducting tests, each operator shall ensure that reasonable precautions are taken to protect its employees and the general public. The testing may be conducted using well head pressure sources and well bore fluids, including natural gas. Such pressure tests shall be repeated once each calendar year to maximum anticipated operating pressure, and operators shall maintain records of such testing for Commission inspection for at least three (3) years. (2) Flowline segments operating at less than fifteen (15) psig are excepted from pressure testing requirements.	maclarej	07/08/2016
Note: Future contact will be made with operator by COGCC Engineering Integrity staff to discuss COGCC series 1100 (flowline) rules; with an emphasis on 1101e. annual flowline pressure testing requirements.	maclarej	07/08/2016
