Subject: Unplanned Sidetrack - Heston LD06-620 - API# 05-123-40816

Good Morning Diana and Stuart,

Regarding the Heston LD06-620 - API# 05-123-40816

Pursuant to the voicemails Diana and our conversation just now Stuart, in which you provided verbal approval to proceed:

We are currently planning to plug back and sidetrack due to stuck/packed off production casing.

Summary:

- Wellbore TD – 16,261' – East/West lateral section
- 5.5" casing was run, stuck and packed off at 16,091'
- 5.5" casing is cutoff at 5911'
- Plan forward is to pull casing from 5911', plug well back (17.5ppg - Class G cement) to ~5300', sidetrack, re-drill curve and lateral section parallel to and approximately 50' north of current wellbore, rerun 5.5" casing and cement as permitted.
- New BHL will be approximately 50' North of current BHL; required documentation will be submitted in a timely manner.

Thanks and Best Regards,

Joshua Lewis
