Subject: FEDERAL #35-1 API#103-08648 MIT deadline extension
Date: Wednesday, July 13, 2016 9:08:00 AM

Mr. Gordon,

The 5 year mechanical integrity test to maintain shut in well status is due 7/12/2016 on this well. As discussed, an extension is given until October 2016 to perform this test. Please remember to consider the following rules:

Rule 316B requires notice to the Director on a Form 42 at least ten (10) days prior to conducting an MIT and submission of MIT results on a Form 21, within thirty (30) days after the test. A pressure chart shall accompany this Form 21 report.

Rule 317.e requires prior written approval on a Form 4 Sundry Notice prior to casing repair operations or any changes to the casing or cement in the wellbore. Verbal approval can be obtained for unforeseen casing repairs during well operations.

Please call if you have any other questions.

Craig Burger
