Permit	Corrected zone type from single to multiple with operator approval. Spacing order doesn't create a unit. Removed distance to unit boundary, unit acres, and unit configuration with operator approval. Waste Management Plan matches filing with original 2A plan. Final review complete.	7/12/2016 2:23:23 PM
Engineer	Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well's surface hole location. All permitted water wells within the search radius show zero for reported depths. Depths to formation tops in offset oil and gas wells, locally-available geophysical logs, and hydrogeologic information was used to evaluate the adequacy of the operator's proposed surface casing setting depth. Offset Well Evaluation: Existing offset oil and gas wells within 1,500 feet of this wellbore meet standards. No mitigation required. Operator's proposed first string cement top is not adequate to satisfy COGCC's new cement coverage requirements, effective April 18, 2016. Increase cement coverage accordingly, as specified in Condition of Approval #5. Per operator: changed distance to wellbore owned by another operator to 5280'.	6/21/2016 2:36:35 PM
Permit	Passed completeness.	6/13/2016 12:00:36 PM
