Rebecca: Anadarko's e-mail is down so I am sending from my Comcast account.

We are ok with the COA listed below:

We do have emission control devices (ECDs) on every tank we set (oil, condensate, water). Due to the fact we do not have the oil infrastructure in Larimer County yet we will be doing monthly inspections.

Cheryl,

After further discussions, we would like to add the following to the emission mitigation measure COA.

Operator must install emission control devices (including the most current VOC destruction and capture technology) on all permanent condensate/oil and produced water storage tanks, regardless of the potential to emit. Operator must conduct monthly Infra-red camera or Method 21 inspections on the well pad.

Please let me know if you have questions.

Thanks,
Rebecca
