Melissa,
Please see Bill's email. Give me a call if you need anything else.

Thanks!
Andrea

Subject: RE: Shook Questions

Yes, we will probably have two 500 bbl flowback tanks on location just for the initial cleanup/cleanout.

We will have one of the following haul to their disposal:

NGL Water Solutions in Brighton

Oilfield Water Logistics in Johnstown

Expedition Water Solutions in Greeley

Subject: Shook Questions

Bill,

COGCC has asked if you plan any temporary frack tanks on location? All other fluids are being piped out correct? Do you know/have a facility that the fluids will be disposed of?

Thanks,

Andrea Gross
