A seep was indentified on the down-gradient side of the Upper BBC Pit. The seep is located between the Upper BBC pit and the Lower BBC pit on the cut slope.			

CORRECTIVE ACTION

Describe immediate response (how stopped, contained and recovered): Water samples were collected from the seep and the Upper BBC pit for comparison. Based on the analytical results, the COGCC was notified on 5/18/10 that there were potential impacts to the subsurface soils. The pit will be drained to assess the liner. More details pertaining to response measures will be documented via a Form 27.

Describe any emergency pits constructed: NA

How was the extent of contamination determined? Investigation of the extent of impacts will be documented via a Form 27.

Further remediation activities proposed (attach separate sheet if needed): Further remediation activities will be documented via a Form 27.

Describe measures taken to prevent problem from reoccurring: The pit will be drained to assess the liner and identify possible compromised locations. The results of this investigation will be included in a Form 27 or a subsequent update to the Form 27.
