**Figure 2:** 9/6/2013 aerial imagery of location. Note area of salt kill below (east) area of pit. Sundry doc 2172955 submitted in 2012 stated reclamation complete.

**Figure 3:** Photo taken from the east end of the pit area, facing northeast. Photo shows fenced off, salt kill area from figure 2.

**Figure 4:** Photo taken from the fenced area on the north end of the location, facing north. Photo shows vegetation on location has not achieved uniform distribution. Possible salt kill remains.

**Figure 5:** Photo taken from the fenced area on the north end of the location, facing north. Photo shows areas of possible salt kill still remaining within the fenced remediation area.

**Figure 6:** Photo taken from the northwest corner of the well location, facing south. Photo shows interim reclamation areas appear to be adequately vegetated.

**Figure 7:** Photo taken from the site of the well, facing north. Photo shows the well location has not achieved uniform perennial vegetative cover. Plants seen are predominantly annual *Thlaspi arvense*

**Figure 8:** Photo taken from the access road on the west end of the well location, facing west. Photo shows access road has not been recontoured.

**Figure 9:** Photo taken from the access road, southwest of the location, facing west. Photo shows access road had not been recontoured.

**Figure 10:** Photo taken from the access road, southwest of the location, facing northwest. Photo shows access road had not been recontoured.

**Figure 11:** Photo taken from the access road, southwest of the location, facing north. Photo shows access road had not been recontoured.
