As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

We had a spill that was found by the lease operator on 8/5/16 at around 12:30PM on the Lickity Split 43-12 well site (API# 05-071-09702). Upon arrival the operator found the packing on the well head leaking water, the leak was isolated immediately and is estimated that 5bbls of produced water were spilled. Most of the water remained on location but a small amount ran down the north side of the lease road (toward the west) about 20' where it ended. No state waters were involved.
