We had an issue on the Winder #6, drilling ahead in the Niobrara we stayed low for a throw we were anticipating. However, it was larger than seismic and the offset well indicated. This caused us to expose the Sharron Springs for 250'. We conditioned mud and weighted up our fluid but this gave us little success. While the hole tried to grab us we felt the best option was to sidetrack. With your permission we would like to open hole sidetrack (no cement) at 7.520'. This will allow us to adjust targets and stay below the Sharron Springs through this throw.
