Called Julia - typo in year portion of dates she provided. She'll update email with correct dates.-Iso

Linda, I show an approved Sundry Notice of Intent to close the pit on 1/13/2010 ("Black Hills Plateau Production is preparing plans to fill in the drilling pit at this location as soon as weather permits and all liquids have been removed from the pit.", then I show my inspection on 5/20/10 documenting that the pit was closed.

HRL or another of BH's contractors might have more accurate data. I will email Jessica and ask her exactly when they closed it, too.

Black Hills federal 35-2

Julia,

I've looked over the information you printed and put on CD for me. Thanks.

Do you have anything that lets you know just when that pit was closed? I see your inspection on 5/20/2009 that sounds like the pit had already been closed.

Reason I ask is that it looks to me like our rules went into effect on 4/1/2009 on all non-federal land, rules that required these pits to be closed to the current Table 910-1 standards. I'm trying to verify the specific date, or a narrow window, when the pit was closed.

Thanks for any info.
