Katie,

The Colorado Oil and Gas Conservation Commission values the ongoing working relationship with the Southern Ute Indian Tribe and their oil and gas operator Red Willow. As a courtesy to the COGCC, spill reports on fee land have been provided by Red Willow Production Company. Notification of Spills/Releases on fee land is greatly appreciated by the COGCC, as is the prompt and effective response demonstrated by the operator. This e-mail shall serve as documentation of the notification provided by Red Willow that this spill/release has been closed by the operator.

Thank you,

Jim Hughes

Jim,

Attached is the signed spill report for final closure on the 34-10 #27-1 FC spill. On the bottom of page two there is a place for you to sign and indicate that you concur with no further action.

Thanks,

Katie

Subject: 34-10 #27-1 FC Spill Report

Jim,

As a courtesy Red Willow is reporting a spill to COGCC.

Red Willow had a 7.8 bbl produced water spill Sunday June 26th at the 34-10 #27-1 FC. Produced water flowed backwards from the main produced water pipeline that leaves location through two ball valves and one check valve to be released on location. All 7.8 bbl of produced water remained on location. No produced water left location. As soon as the lease operator discovered the spill he shut in the pipeline to prevent additional produced water from being released. Attached are the spill report form, a spill map, and photographs.

Red Willow proposes no further action on this spill. The water quality of produced water near the Fruitland outcrop has low TDS, salts and conductivity. A produced water sample was taken on 1/26/2016 from the #27-1 FC well. TDS was 1470 mg/L.

Please let me know if you have any questions.

Thanks,

Katie
