## RECLAMATION

### INTERIM RECLAMATION

☐ Interim Reclamation will commence approximately \_\_\_\_\_

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

**Field inspection will be conducted to document Rule 1003.e. compliance**

### FINAL RECLAMATION

☐ Final Reclamation will commence approximately \_\_\_\_\_

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

☐ Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

**Field inspection will be conducted to document Rule 1004.c. compliance**

## COMMENTS:

Add one (1) separator, one (1) VOC combustor, and one (1) flare to location. Therefore, the new totals are two (2) separators, one (1) VOC combustor, and one (1) flare.

One flowline is installed from the wellhead to the separator carrying multiphase flow. During production, the flow is from the wellhead to the production facility. This buried flowline is a 3 inch schedule 40 steel pipeline and approximately 125 feet in length.

Two (2) lines begin from the separator. The first line from the separator is a gas line routed to the flare/VOC combustor and the second line is a liquid line connected to a treater. The treater then has three (3) lines emanating from it: one line to the flare/VOC combustor; one line to the oil production tanks; and one line to the water tank.

The modification of this existing Oil & gas location was within the originally disturbed area, and there was not additional surface disturbance. In addition, the modification did not change the cultural distances included on the original Form 2A.

## H2S REPORTING

**Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.**

**Gas Analysis Report must be attached.**
