Comment: **See "COGCC Comments"**

Corrective Action: **Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture that matches the adjacent pastureland or a seed mixture requested by the landowner. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 11/15/2016**

Date **11/15/2016**

Overall Final Reclamation **Fail**

COGCC Comments

Comment	User	Date
<p>This location does not meet reclamation regulations; insufficient vegetative cover. Gravel still remaining on location as well as pipe, this needs to be removed and the areas need to be reclaimed.</p> <p>Large area on the southern end of the location remains bare with erosion evident. Well file documents suggest this area is a salt kill due discharged produced water from a pit. These areas needs to be stabilized and reclaimed. See attached photo document.</p>	trujilloam	08/23/2016
