Denver, CO 80202

**Dear Sir or Madam:**

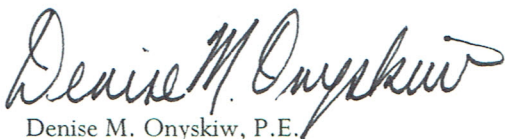

On behalf of Waste Management (WM) and in accordance with Rule 325i of the Colorado Oil and Gas Conservation Commission (COGCC), this letter serves as a notification by WM of its application with the COGCC to drill a well for the disposal of exploration and production waste on their property at Section 26, Township 3 North, Range 64 West in Weld County. WM is applying for approval from the COGCC to inject produced water into the well between 9000 feet (Lyons formation) to 10,800 feet (200 feet above basement) for the purposes of disposal.

In accordance with Rule 325l, any person who would be directly and adversely affected or aggrieved by authorization of the proposed injection well may file, within fifteen (15) days of notification, a written request for a public hearing before the Commission, provided such request meets the protest requirements in subparagraph m of this rule.

Subparagraph m states that written protests shall specifically provide information on: (1) Possible conflicts between the injection zone's proposed disposal use and present or future use as a source of drinking water or present or future use as a source of hydrocarbons, or (2) Operations at the well site which may affect potential and current sources of drinking water.

Additional information on the operation of the proposed disposal well may be obtained at the Commission office. If you have any questions, please do not hesitate to call me at (720) 260-2963 or Jason Chan of WM at (303) 486-6063.

Sincerely yours,

Denise M. Onyskiw, P.E.
