Kris,

Good afternoon,

In regards to remediation project 9706 - Duncan Ranch cuttings drying - I received confirmation from our dirt contractor that they will be on site tomorrow to turn the cuttings piles again. We may sample the cuttings in early September to begin the procedure to obtain permission to bury the cuttings.

The flaring activity continues. The cuttings area berms remain intact and the well pad berms and stormwater ditching remain intact. There have not been any significant rain events or ponding of water in the cuttings area.

I'll keep you posted,

Rick
