OPERATOR COMMENTS AND SUBMITTAL

Comments This Form 2 is being submitted as a re-filed APD for the McLin A 34A-12-06-92 well. No changes to the well are proposed at this time. First String / Production cement will be > 500 feet above TOG. BMPs were approved with the McLin A Pad (Location ID# 421223) Form 2A. Approval of the McLin A Pad Form 2A occurred prior to the implementation of the Setback Rules (effective date August 1, 2013), therefore the Buffer Zone notice was not required. I certify that there have been no changes on land use, lease description. The pad has been built, and contains 5 existing wells. There will be no additional surface disturbance. The location does not require a variance from any of the rules listed in Rule 306.d.(1).(A).(ii). The location is not within a wildlife Restricted Surface Occupancy Area. There have been no changes to the mineral lease.

Permit	Drilling and Waste management plans match the approved form 2A. Added Sec 12 to unit description with operator approval. Added logging BMP as per operator. Checked box for previously approved location and notified operator. Final review complete.	8/31/2016 2:51:03 PM
Engineer	Offset water well check: COGCC evaluated offset water wells within one mile of this proposed well's surface hole location. This information was used in addition to locally-available geophysical logs and hydrogeologic information was used to evaluate the adequacy of the operator's proposed surface casing setting depth. The deepest water well within one mile is 380 feet. Offset Well Evaluation: Existing offset oil and gas wells within 1,500 feet of this wellbore meet standards. No mitigation required. Operator's proposed first string cement top is not adequate to satisfy COGCC's new cement coverage requirements, effective April 18, 2016. Increase cement coverage accordingly, as specified in Condition of Approval #5. Per operator: changed distance to wellbore owned by another operator to 4800'.	6/29/2016 2:25:24 PM
