**Subject:** Jolly Platts

Hi Chuck – reminder – we also need the flaring request for the 3 wells associated with this battery. There needs to be a gas analysis that specifically includes hydrogen sulfide; an explanation of why there is flaring and an economic evaluation as to why the gas isn't being sold – this needs to be thoughtful (distance to pipeline vs gas EUR, alternative methods that may have been contemplated to use the gas, etc.); the gas needs to be metered at minimum at the 2 different leases –the Jolly Platt can be allocated to the 2 different wells. At this point we would expect that CDPHE has done whatever approving they need to do for the flaring or at minimum the paperwork you would have submitted to them should have an assigned number from CDPHE while it is in their processing queue, that should be included in the Form 4 Sundry Notice.

Thanks,  
Diana
