1	If an MOU has not been obtained from Adams County then reject this request so that the LGD can be aware of this site and take local appropriate action.	01/05/2016
2	If an MOU has not been obtained from Adams County then reject this request so that the LGD can be aware of this site and take local appropriate action. The oil and gas operator should be required to sign an MOU with the local land use authority before any permits are approved.	01/06/2016
3	A community meeting needs to be held on this to notify homeowners before this permit should be approved.	01/06/2016
4	This area has a ton of new home subdivisions and the location is too close to these homes to be able to permit this without a proper emergency plan with the local emergency services trained and equipped to handle any type of emergency that can arise.	01/06/2016
5	The roads along HWY7 are insufficient at this point to be able all the new development in the area. Handling the increased truck traffic along it would make it impossible for the current residents. Widening and traffic lights would be required in order to accomodate this activity.	01/06/2016
6	The City of Thornton is in the process of reviewing and updating their current regulations on oil and gas development. Until the City Council completes this review, all new permits that are close enough to affect City of Thornton residents, use City of Thornton services, or require other services like possible right of ways for pipelines should be deferred until the City Council has completed this review and update.	01/06/2016
7	The government of Adams County is in the process of updating their current requirements with regards to oil and gas to include improved public input requirements, improved air quality monitoring and possibly their own inspector. All permits should be deferred until that review and update is completed.	01/06/2016
