### Description

1	Drilling/Completion Operations	This well will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hoe logs shall clearly state "No open-hole logs were run" and shall clearly identify the well (by API#, well name and number) in which open-hole logs were run.
