NFA for Remediation #7952 - Jacobucci 13-32, 23-32 Tank Battery (NWSW 32 - 1N - 67W) - 05-123-20024

j
The COGCC has reviewed the NFA** request for remediation #7952. Based on the information presented, no further action is necessary at this time. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards then further investigation and/or remediation activities may be required at the site.

Please retain a copy of this e-mail as verification of No Further Action required.

**Note - and earlier NFA was sent via e-mail but is not in the remediation documents. The NFA is below:

Correspondence Log:

Final Resolution

Date	Case Closed?	Letter Sent?	COGCC person
12/22/2015	Y		Jennifer Hussey

As presented in the Form 27 Supplement and Request for No Further Action (see document #2210688), additional confirmation soil sampling was conducted per the COAs and sample results indicate that the remaining hydrocarbon concentrations in soil are below the COGCC Table 910-1 concentration levels. COGCC concurs that no further action is necessary at this time. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be impacted, further investigation and/or remediation activities may be required at the site. Note that surface reclamation must meet the COGCC 1004 series rules.
