---

I am fine with placing cement there.

Thanks,  
Diana

Diana,

I tried calling a few minutes ago and I am not trying to overwhelm you all but I thought I'd ship an email off with some more detail of the situation. You approved the Form 6 for the HSR-VAN SCHAACK 4-11 (API# 0500109285). We are currently trying to get back in our csg stub after pulling the production csg at the planned depth of 2060' this morning and are having trouble getting 100' into the stub. We are currently at 2122' and cannot get any further. Do you have any problem with us pumping our planned 240sx plug at this depth instead of the intended 2160'?

Thanks,

**Mike Lee**
