General Comment:

Environmental Inspection conducted on 09/20/2016. ON Site with Brett Middleton from Encana. Sunny and cool. Pit was backfilled with material that was not in compliance yet. Approximately 10 boreholes were recently drilled on the pit location (footprint). According to Encana only one sample presented concentrations above Table 910-1 and still requires some in-situ remediation. Pit Facility ID #335680 will remain ACTIVE until remediation is completed. Same for REM #9307. There is one Encana active well onsite (API 045 15497) and an injection well operated by Hunter Ridge (API 045 15495).

No weeds, staining or junk was observed onsite.
