General Comment:

PRAW Location Inspection. Inspection at request of Engineering Group concerned about Weeds at site. Area fenced off is approximately a 16th of an acre, bisected by irrigation ditch. Much of the vegetation is desirable perennials that have overgrown because livestock is fenced out. Kochia, Sage Wort and Chicory are the weeds noted. Ditch will prevent any mowing efforts. Plants are past stage where Herbicides would be effective and so mature and dense that even Hand work will be difficult. Weed control efforts will be scheduled for Spring 2017. If P&A is finalized, site cleared for FR and Fence can be removed Weed control will be simplified, and Livestock grazing will control overgrowth of Perennials. No Noxious Weeds were Identified on Location.
