**General Comment:**

Environmental Inspection conducted on September 07 to discuss Caerus request to postpone installation of SVE system (see Feb 2016 approved remediation project #9491). On site with Jake Janicek and Michael McKee, from Caerus, and Stan Spencer from the COGCC. A large landslide present immediately up gradient of the pad surface constitutes currently a safety hazard. The COGCC agreed that drilling at this time is not recommended and agreed to re-evaluate the site conditions, early next year, 2017.
